hey @JJsEmporium and @Kathis

I tried the above with some modifications to get this :

⚪🔵🔴⚫

please follow below:

in Edit code > theme.scss file > paste the below at the end of the code

```
.ColorSwatch {
  border-radius: 50%;
}
.ColorSwatch:hover::after {
    border-radius: 50%;
}
```

Now in the same file (theme.scss.liquid) ctrl +f and find

```
.ColorSwatch.is-active::after,
.ColorSwatch__Radio:checked + .ColorSwatch::after {
  border: 1px solid currentColor !important;
}
```

After important just add:

border-radius: 50% !important;

It will look like this then:

```
.ColorSwatch.is-active::after,
.ColorSwatch__Radio:checked + .ColorSwatch::after {
  border: 1px solid currentColor !important;
  border-radius: 50% !important;
}
```

Hope this helps! Do let me know if the solution is acceptable. Feel free to contact for further assistance 🙂
